

Over the Counter Medications

Charles Towne Montessori may give OTC medication to students ages 6 and up with the following parental waiver.

Medication will be dispensed according to a child's age and weight, and by recommended increments. If a child has received medication at home it is NECESSARY to inform the school so that appropriate dosage times can be followed.

Permission to administer OTC medications:

Check if approved	Medication	Dosage for your child
	Acetaminophen	
	Ibuprofen	
	Hydrocortisone cream	N/A
	Allergy topical	N/A
	Insect bite/sting reliever	N/A

This form is for INCIDENTAL needs only. If a child will need regular administration of any OTC or prescription medication, an appropriate document must be kept on file at CTM after being signed by the parent/guardian.

In the case of fever or injury, I understand that the school will call me to pick up my child and that first aid will not be the only course of action.

I understand that medication is not required to be supplied by CTM and that the school will not be held responsible if there is not medicine available. Parents may supply medication for incidental needs to be stored in the office. This will be labeled with the student's name and kept specifically for him/her.

I hereby give Charles Towne Montessori to give my child above approved OTC medication as deemed necessary by the teacher and administrator.
